Research Topics: strabismus, neuro-ophthalmology, amblyopia, ocular motility, visual rehabilitation

Prof. Catherine Cassiman, MD, PhD, is Head of the Department of Ophthalmology at UZ Leuven and Associate Professor at KU Leuven. She specializes in pediatric ophthalmology, strabismus, neuro-ophthalmology, and visual rehabilitation. Following international observerships at Moorfields Eye Hospital and Great Ormond Street Hospital in London, and Hôpital Necker–Enfants Malades in Paris, she obtained a PhD on ophthalmic screening in children with neurofibromatosis type 1. Alongside her clinical and research activities, she is actively involved in medical education, teaching medical students, residents, nurses, and allied health professionals. Her clinical and research interests include neuro-ophthalmology and visual vertigo, with a strong focus on multidisciplinary care. She is also committed to global eye care and has participated in humanitarian missions in Rwanda, where she performs strabismus surgery.
