

Jennifer Fisher, OD, FAAO, FOVDR
Herbert Wertheim School of Optometry at UC Berkeley
jenhfisher@berkeley.edu
Research Topics: strabismus, amblyopia, vision therapy, traumatic brain injury, visual-vestibular

Dr. Jennifer Fisher is an Associate Clinical Professor in the Binocular Vision Clinic at the Herbert Wertheim School of Optometry & Vision Science at the University of California, Berkeley. She specializes in binocular vision, vision therapy, vision rehabilitation, strabismus, and visual disorders associated with acquired brain injury and learning-related visual dysfunction. Dr. Fisher is actively involved in clinical research, including as a Protocol Principal Investigator for the Pediatric Eye Disease Investigator Group (PEDIG), and has contributed to multicenter clinical trials and research publications. She is also dedicated to optometric education and professional leadership, serving as Chair of the Binocular Vision, Perception, and Pediatric Educators Special Interest Group within the Association of Schools and Colleges of Optometry. Her clinical, research, and teaching experience provides a strong foundation for peer review in binocular vision, pediatric optometry, strabismus, vision rehabilitation, and related areas.
