Research Topics: Strabismus; paediatric ophthalmology; adult strabismus; minimally invasive strabismus surgery (MISS); ocular motility; neuro-ophthalmology; stereopsis; psychosocial aspects of strabismus

Daniel S. Mojon is a Swiss ophthalmologist and ophthalmic surgeon and Honorary Professor of Ophthalmology at the University of Bern. He is CMO of a Swiss ophthalmology postgraduate training network and practises in St. Gallen, Heiden, Zurich Airport and Bülach. He is internationally known for developing Minimally Invasive Strabismus Surgery (MISS), a concept he has taught and refined in complex paediatric and adult strabismus surgery for more than three decades. His research interests include strabismus, ocular motility, neuro-ophthalmology, stereopsis, the psychosocial consequences of strabismus and minimally invasive ophthalmic surgery. He has also contributed to surgical and diagnostic innovations in cataract and glaucoma care. Mojon is Vice President of the Swiss Academy of Ophthalmology and President of the Association of Ophthalmologists of Eastern Switzerland.
