Research Topics: Strabismus Surgery, Myopia, Pediatric Cataract, Imaging, Genetics and AI

Dr. Sukhija is Professor of Pediatric Ophthalmology, Strabismus, and Neuro-Ophthalmology with over 18 years of experience at Post Graduate Institute of Medical Education and Research, Chandigarh, India, which is one of the country's largest tertiary care centers. He has presented and won accolades for his research in Pediatric Ophthalmology at both national and international meetings and has been invited as a speaker and guest faculty at various conferences. He has published more than 150 articles in reputed indexed journals and holds an H-index of 22. He has improvised the techniques for cataract surgery in children in simple and complex cases. His other areas of interest include myopia in children, complex strabismus, and imaging in pediatric cataract. Additionally, he serves as an editorial board member of international and national journals and is a member of international and national scientific committees. He enjoys listening to music in his free time and tries not to miss his badminton game.
