Research Topics: amblyopia, strabismus, myopia, and retinopathy of prematurity

Jingyun Wang, PhD, is a tenured Associate Professor at the State University of New York College of Optometry. She earned her PhD in Vision Science from Indiana University and previously held faculty appointments at the Glick Eye Institute (Indiana University School of Medicine) and Salus University Pennsylvania College of Optometry. Dr. Wang's Pediatric Vision Research Lab focuses on diagnosing and treating pediatric eye conditions, including amblyopia, strabismus, myopia, and retinopathy of prematurity. Her basic and translational research examines visual development, refractive errors, and retinal structure and function in children, supported by both local and national grants. She contributes to national multi-center studies, including the PEDIG and G-ROP groups. Dr. Wang frequently reviews for more than 30 academic journals. She serves on the Scientific Program Committee for the American Academy of Optometry and previously served on ARVO's EY Program Committee.
